LOCATION

Designed for equine veterinary use. V-Pro provides you with an all-inclusive solution to safely, efficiently & easily perform in-depth cardiac investigation & equine health monitoring.

Real-time monitoring with push notifications.

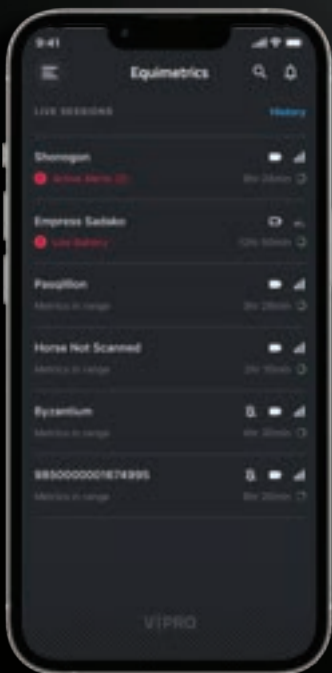

Integrated microchip scanning for easy horse identification.

On-board ECG with 24 hour capability, live trace & exercise ECG.

Easy to use app for phone, tablet & desktop.

Customizable alerts & notifications to your phone.

Secure encrypted data storage in the cloud.

EQUINE CLINIC

V-Pro enables the continuous remote monitoring of patients, offers real-time status alerts, and delivers better insights for equine care.

- Real-time ICU monitoring; alert on-call staff to changes in patient vitals or behavior as they happen.
- Conduct at rest ECG & exercise ECG at the touch of a button.
- Evaluate cardiac and behavioral anomalies.
- Minimise on-call duty requirements through remote monitoring of patients.

ECG FEATURES

The embedded ECG electrodes facilitate thorough cardiac investigation at the touch of a button. Collection of ECG data can be initiated through the app and run for a period of 24 hours without interruption.

- Fully wireless solution with remote streaming.
- Fully portable 24 hour ECG, live ECG & exercise ECG.
- Gain better insights into the causes of anomalies.

AMBULATORY VETERINARIANS

V-Pro provides independent veterinarians the ability to offer on-going intensive monitoring beyond the hospital environment.

- Monitor horse health from anywhere – capture insights immediately onsite & continue to monitor whilst you conduct other calls.
- Ability to conduct detailed ECG in any location & share with colleagues.
- Ability to conduct exercise ECG in the case of poor performance investigation.

Smart Equine Monitoring

Equimetrics provide real-time monitoring solutions that track horse health and behaviour. Used by equine vets, trainers and owners, Equimetrics' remote monitoring solutions can deliver smart equine monitoring 24 x7 no matter where your horse is located. Designed & developed in Ireland – the home of the horse.
