Equimetrics®

S:PRO

Time & Speed **Stride Analysis** **Heartrate Zone** **Course & Terrain** **Recovery Rate** **Training Reports**

Equine sports performance with data driven results.
Helping you train smarter, push performance further,
and protect your horse's wellbeing.

The state-of-the-art
saddle pad combines
layers of lightweight
air-mesh and stretch
fabrics for durability
and comfort.

The integrated sensor
technology layer captures
heart rate data seemlessly.

The rugged design of the
S-PRO sensor is water
resistant and works in all
conditions.

The sensor can be
easily moved from
horse to horse to
facilitate multi-horse
data recording.

The S-PRO app provides
detailed equine performance
and recovery data, allowing
you to track your horse's
speed, heart rate and stride
data throughout exercise.

S-PRO PAD

▪ Ergonomically designed saddle pad supporting equine movement and rider comfort, made with layers of lightweight air-mesh and stretch fabrics.

▪ Fully integrated electronics, electrodes, and sensors seamlessly built into the fabric layers.

▪ Simple to use: wet the pad, power on, scan the horse's microchip, then clip in the sensor and go. The sensor records all biometric and movement data during exercise, including heart rate and heart rate recovery.

▪ Rechargeable sensor transferable from horse to horse throughout the morning's exercise to facilitate easy multi-horse recording.

S-PRO Data

▪ Provides comprehensive insights to review and optimise your horse's training.

▪ Onboard GPS tracks speed, course map, and terrain - elevation. Speed data is presented in furlong splits.

▪ High-resolution heart monitor (120 Hz) delivers precise effort and exertion data as time in each heart rate zone.

▪ Built-in 9-axis gyroscope enables detailed stride analysis includung stride length, and cadence.

▪ Post-exercise heart rate recovery tracking offers valuable fitness and conditioning insights.

S-PRO App

▪ All data is securely uploaded to the cloud and available for analysis in the S-PRO app.

▪ The app delivers a comprehensive breakdown of each session, as well as the ability to track performance over time and to compare horses against each other.

▪ Customisable training reports can be generated and shared instantly with your wider team and with owners.

▪ Available on iOS and Android platforms.
